Ascession: T30826
A; Status: Differential splicing-in of a proline-rich exon converts alphaNAC into a muse (Species in Museulus (house mouse)
C; Species: Nus musculus (house mouse)
C; Accession: T30826
R; Yotov, W.V.; St-Arnaud, R.
Genes Dev. 10, 1763-1772, 1996
A; Title: Differential splicing-in of a proline-rich exon converts alphaNAC into a mus A; Reference number: Z20889; MUID: 96312450
A; Accession: T30826
A; Status: preliminary; translated from GB/EMBL/DDBJ
A; Molecule type: DNA
A; Molecule type: DNA
A; Residues: 1-2187 < x707>
A; Genetics:
A; Genetics:
A; Genetics:
A; Genetics:
A; Genetics:
A; Map position: 10
A; Introns: 24/1; 1996/1; 2024/3; 2050/3; 2099/3; 2142/3; 2183/3
A; Note: differential splicing; DNA binding; transcription factor
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              92;

C14B9.6 protein - Caenorhabditis elegans
C15Fecies: Caenorhabditis elegans
C; Species: Caenorhabditis elegans
C; Accession: 844758
R; Ravello, A.D.
Submitted to the EMEL Data Library, May 1993
A; Description: Sequence of the C. elegans cosmid C14B9.
A; Reference number: 844617
A; Accession: 844758
A; Status: preliminary
A; Wolecule type: DNA
A; Residues: 1-1018 < FAV>
A; Residues: 1-1018 < FAV>
